

Maximum pressure in the tank	0.3 MPa
Maximum heating water temperature in the tank	90 °C

# NAD 500 v2 NAD 750 v2 NAD 1000 v2

Accumulation tanks **NAD v2** may be provided with G 1½" optional sockets. A G 1½" socket allows the installation of a TJ 6/4" electric heating unit. The number of sockets may vary and may be customized upon customer's requirements. The socket is plugged in the basic design.

Accumulation tanks are supplied with a high-quality insulation Symbio made of polyester fleece.
